TERRY WOLFE

DATA CENTER OPERATIONS | IT INFRASTRUCTURE | NETWORKING | ELECTRONICS | CYBER OPERATIONS

Tucson, AZ | 518-727-4972 | twolfe44@cox.net

PROFESSIONAL SUMMARY

Technical infrastructure professional with 20+ years of hands-on experience spanning data-center hardware, enterprise networking, electronics, low-voltage systems, physical security, and field service. Former Junior Network Administrator at Fort Huachuca and experienced NCR data-center technician performing hardware replacement, controlled shutdown coordination, cabling troubleshooting, and re-termination. Current University of Arizona Electronics Access Control Technician. Combines an A.A.S. in Electronics Technology with a B.A.S. in Cyber Operations — Defense & Forensics.

CORE TECHNICAL STRENGTHS

Data Center Operations: Hardware replacement • Fans • Memory • Hard drives • Controlled shutdowns • Preventive maintenance

Networking: TCP/IP • Cisco • Cat 5 • Cable termination • Routers • Switches • VLANs • Patch panels • Cable management

IT Infrastructure: Windows • Linux • VMware • Hardware/software troubleshooting • Equipment configuration • Technical documentation

Electronics & Facilities: Electronics diagnostics • Low-voltage wiring • Access control • Controllers • Equipment replacement

Cybersecurity: Network security • Wazuh • Security Onion • Wireshark • Nmap • Snort • Suricata • Python

PROFESSIONAL EXPERIENCE

UNIVERSITY OF ARIZONA — Electronics Access Control Technician

Tucson, AZ | March 2020 – Present

- Install, configure, troubleshoot, maintain, and replace electronic access-control systems, controllers, door hardware, and related infrastructure.
- Diagnose hardware, software, controller, and low-voltage wiring problems; perform system testing and preventive maintenance.

- Maintain secure credential databases and campus access infrastructure; coordinate technical issues with IT and Facilities.
- Support reliable operation of security-critical infrastructure through equipment replacement, documentation, troubleshooting, and corrective maintenance.

CITY OF TUCSON WATER — Electronic Calibration Technician

Tucson, AZ | November 2018 – November 2019

- Performed electronic equipment calibration, testing, troubleshooting, maintenance, and technical documentation.
- Diagnosed equipment issues and supported reliable operation of technical systems in an operational environment.

NCR CORPORATION — Field Engineer / Data Center & Enterprise Hardware Support

Multiple Sites | November 2009 – October 2018

- Performed hands-on **data-center hardware replacement**, including fans, memory modules, and hard drives.
- Coordinated with remote operations personnel to log out users/processes and perform **controlled equipment shutdowns** before hardware replacement.
- Troubleshot **Cat 5 network cabling** and re-terminated connections as needed to restore reliable connectivity.
- Installed, diagnosed, repaired, replaced, and maintained enterprise customer hardware and technology systems in field and data-center environments.
- Performed preventive maintenance, equipment replacement, onsite technical support, and troubleshooting while following operational procedures.

BANCSOURCE — Field Service Technician

Multiple Sites | January 2005 – April 2009

- Installed, maintained, repaired, and supported banking technology and electronic equipment.
- Performed onsite diagnostics, preventive maintenance, equipment replacement, and technical troubleshooting.

FORT HUACHUCA — Junior Network Administrator

Sierra Vista, AZ | Earlier Career

- Supported enterprise network administration and technical infrastructure in a U.S. Army installation environment.
- Applied networking and troubleshooting skills to maintain reliable connectivity and support operational users and systems.

U.S. NAVY — Radioman / Technical Communications

U.S. Navy | March 1986 – August 1989

- Honorable service with technical communications, equipment troubleshooting, operational discipline, and mission-focused teamwork.
- Qualified as a Radioman after advanced technical communications training in San Diego, California.

EDUCATION & CERTIFICATIONS

B.A.S., Cyber Operations — Defense & Forensics
University of Arizona | 2025

A.A.S., Electronics Technology
Cochise College | 1992

Graduate Certificate, Cyber Operations
University of Arizona | Expected 2027

Certifications: CompTIA A+ • CompTIA Network+ • CompTIA Security+ *(In Progress)*

HANDS-ON NETWORKING & CYBERSECURITY LAB

- Maintain a home networking lab with **router, switch, patch panel, structured cabling, and cable management**.
- Configure and troubleshoot network segmentation and **VLANs**; apply practical TCP/IP and network-security concepts.
- VMware-based laboratory experience with Windows and Linux, Wazuh, Security Onion, Wireshark, Nmap, Snort, Suricata, and Python.
- Use cybersecurity tooling for network monitoring, security analysis, automation, troubleshooting, and defensive experimentation.
